SUMMARY
Analytical MCA postgraduate skilled in **Python, SQL, and Power BI** for data analysis and visualization. Experienced in building interactive dashboards and managing databases (**MySQL, PostgreSQL**) to deliver actionable business insights.

EDUCATION
Master Of Computer Application
Kle DR MS Seshagiri College of Engineering & Technology,
Belgaum
Current CGPA: 8.4

PERSONAL EXPERIENCE
Intern – Olympiad Examination Council

- Developed Master and Admin Dashboards to monitor and manage exam data efficiently.
- Designed and manipulated database tables for handling student records, exam results, and reports.
- Contributed to building a full-stack online examination portal with team collaboration.
- Integrated data visualization and backend functionalities to streamline exam management and reporting processes.
- Participated in testing and deployment using XAMPP for local server management.
- Technologies: HTML, CSS, JavaScript, Bootstrap, SQL, XAMPP

TECHNICAL SKILLS

- Languages: Python, SQL, Matplotlib, Pandas, NumPy
- Databases: MySQL, Workbench, Oracle, pgAdmin
- Developer Tools: Git, Visual Studio, IntelliJ IDEA, PyCharm, Jupiter Notebook
- Web/Operating System: Windows
- Technical Proficiencies: Object-Oriented Programming, Database Management System, Data Analysis, Data Modelling, Data Visualization, Data preprocessing Excel, Power BI
- Soft Skills: Leadership, Problem-Solving, Collaboration

PROJECTS

AI Impact on Jobs Dashboard | Power BI Project
Tools: Power BI, Data Visualization, DAX, Data Analysis

- Developed an interactive Power BI dashboard analyzing the global impact of Artificial Intelligence on jobs across industries.
- Visualized key metrics such as Automation Risk, AI Replacement Score, Reskilling Urgency, and AI Adoption Levels.
- Created visuals including industry risk analysis, salary impact comparison, skill demand by job role, and global AI adoption map.
- Implemented interactive slicers for job roles and automation risk categories to enable dynamic data exploration.
- Generated insights on how AI influences workforce skills, salary trends, and industry-level automation risks.

Netflix Movie Analysis | Python Data Analysis Project
Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Performed data cleaning and exploratory data analysis (EDA) on Netflix movie dataset to identify trends in ratings, popularity, and genres.
- Created visualizations including bar charts, pie charts, line plots, and scatter plots to analyze movie performance.
- Analyzed vote averages, popularity levels, genre distribution, and release year trends to understand audience preferences.
- Generated insights that highlight patterns in movie popularity and content trends on the Netflix platform.

CERTIFICATE'S

- Deloitte-Data analytics
- SQL Micro Course
- Power BI Micro Course
